2. Water quality and wastewater reclamation

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES NO

JAN 25 2000  
 KN

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statement of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

(3) assists the State to determine if additional water is available for future appropriators.

Statement of Water Use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their divisions, and record of water use, (1) provides a statement of a statement (1) provides a record of Water Division and Use must be filed by riparian and per 1914 appropriate water users. The filing of a statement

only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

An appropriate right is required for use of water on nonirrigation land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State to determine if additional water is available for future appropriators.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

Reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a user must share the water supply with other riparian users.

The above are two principal types of surface water rights in California. They are riparian and appropriate rights.

September 25, 1994

State Water Resources Control Board  
Division of Water Rights  
P.O. Box 2000  
Sacramento, California 95812-2000

California Department of Parks and Recreation, Mendocino Sector has been filing Supplemental Statement of Water Diversion and Use for water diversion at Van Damme State Park. Upon review of our records, I have found an error in the diversion location. Pat Maroni, Associate Engineer from SWRCB suggested that we request a modification of our diversion statements. We have been filling out 2 statements for the following locations:

- #008645      Slide Creek, tributary to Little River, Mendocino County  
SW 1/4 of SE 1/4, Section 04, T16N, R17W, MDB&M
- #000117      Slide Creek, tributary to Little River, Mendocino County  
SW 1/4 of SE 1/4, Section 03, T16N, R17W MDB&M

The actual diversion location is farther downstream on Little River, tributary to the ocean, Mendocino County, NW 1/4 of SE 1/4, Section 05, T16N, R17W, MDB&M.

F-34  
Mendocino

Van Damme State Park encompasses 60% of the watershed. State Parks owns the land at the reported diversion locations and the actual diversion location. The water is used within the watershed (Van Damme Campground).

Enclosed are copies of past Supplemental Statement of Water Diversion and Use and a current Statement of Water Diversion on Use with the correct information on it.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different water system. Generally, appropriative rights may be exercised only when there is a surplus of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Since 1914 new appropriators have been required to obtain a permit and license from the State. An appropriate right is required for use of water on nonriparian land and for storage to obtain a permit and license from the State.

Statement of Water Diversions and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water upstream from their diversion, and (3) assists the State to determine if additional use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional upsteam from their diversion, and (3) assists the State to determine if additional diversion concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Information Pertaining to Water Rights in California",  
"Water Rights for Stockponds Constructed Prior to 1969",  
"Statement of Water Diversions and Use",  
"Appropriation of Water in California".

"Information Pertaining to Water Rights in California",  
"Water Rights for Stockponds Constructed Prior to 1969",  
"Statement of Water Diversions and Use",  
"Appropriation of Water in California".
